STERLING® TOILETS WITH DUAL FORCE™ TECHNOLOGY

Dual Force technology by Sterling provides an outstanding combination of water conservation and exceptional performance. Operated by a user-friendly, two-button actuator integrated into the tank lid, STERLING toilets with Dual Force technology flush either 1.6 gallons or .8 gallon. The .8 gallon flush option, for liquid and light waste, can save a household of four up to 25,000* gallons of water per year.

Equally impressive, the 1.6-gallon setting, assisted by the toilet's flapperless valve and large trapway, consistently removes bulk waste with just one flush, eliminating the need for wasteful, repetitive flushing. In addition, 100% of the water passes through the rim, keeping the bowl clean with its siphonic washdown system.

Two-Button Actuator
1.6 gallon, left and .8 gallon, right

*25,000 gallons versus a 3.5 gallon toilet, or 6,000 gallons versus a 1.6 gallon toilet.

Dual Force Tank Interior

Karsten™ Toilet

The Karsten toilet excels at saving water without compromising tremendous bulk flushing capabilities. The contemporary style of Karsten makes this toilet a perfect choice for baths inspired by sleek, streamlined decorating schemes. Available in both round-front and elongated bowls, the Karsten with Dual Force technology captures flushing innovation, water conservation and design inspiration in a single toilet.

Rockton™ Toilet

The Rockton toilet with Dual Force technology delivers an unprecedented combination of water conservation and reliable performance. It also offers a great design solution for the bathroom. With a clean and understated aesthetic, the Rockton toilet by Sterling complements any bathroom décor. It is available in a choice of bowl shapes. The round-front option is perfect for a smaller bath or powder room, while the elongated bowl offers additional user comfort.
